Professional Summary

Software Engineer with internship experience developing scalable backend applications using Java, Spring Boot, Python, and Node.js. Experienced in REST APIs, SQL/NoSQL databases, secure authentication, and Generative AI integration. Strong foundation in cloud technologies, CI/CD, and software engineering.

Technical Skills

Programming Languages:	Java, Python, JavaScript, SQL, C, C++
Backend Technologies:	Spring Boot, Node.js, Express.js, REST APIs, Hibernate, JDBC, JPA, Microservices
AI & Machine Learning:	Generative AI, LLMs, Prompt Engineering, Google Gemini API, Grok SDK
Databases:	PostgreSQL, MySQL, MongoDB, Redis
Cloud & DevOps:	AWS S3, Docker, Git, GitHub, GitHub Actions, CI/CD
Security:	JWT Authentication, RBAC, Authentication, Authorization, Input Validation
Core Concepts:	Data Structures, OOP, DBMS, Operating Systems, Computer Networks, SDLC, Agile

Experience

Software Developer Intern Jan 2026 – Present

Technosy Software Pvt. Ltd., Pune

- Developed scalable REST APIs using Node.js, Express.js, and MongoDB.
- Integrated secure backend workflows with CBS and WhatsApp Banking.
- Built reusable middleware for authentication, validation, and error handling.
- Worked in Agile teams using Git, API testing, debugging, and deployment tools.
- Contributed to an AI-powered accessibility platform through backend APIs and database development.

Projects

StudexaAI – AI-Powered Personalized Learning Platform *Node.js, Express.js, React.js, MongoDB*

- Developed an AI-powered learning platform using Node.js, React.js, and Generative AI APIs to generate personalized quizzes and learning content.
- Integrated Grok SDK to automate quiz generation and AI-assisted learning recommendations.
- Built secure REST APIs with JWT authentication and MongoDB for user management and AI-powered services.
- Secured **2nd Rank** at the Linkcode Hackathon for developing an innovative AI-driven educational platform.

SecureBank – Banking Backend Management System *Java, Spring Boot, Hibernate, MySQL*

- Developed a secure banking backend application using Spring Boot, Hibernate, and MySQL for account and transaction management.
- Implemented authentication, authorization, input validation, exception handling, and RESTful APIs following secure coding practices.
- Designed a layered architecture with Hibernate ORM and optimized SQL queries to improve backend performance.

Education

B.E. Electronics & Telecommunication Engineering, SPPU (2022–2026)

CGPA: 7.33/10

Achievements & Certifications

Achievements

President – E-Rickshaw R&D Club
Selected Contributor – GirlScript Summer of Code
Core Committee Member – TechRythm Fest
2nd Rank – Linkcode Hackathon

Certifications

Java Full Stack Development (Linkcode Technologies)
Machine Learning & Deep Learning (Edunet)
Core Java Certification (FUEL Organization)
Python Internship (CodSoft)
